DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1&2 are rejected under 35 U.S.C. 102(b) as being anticipated by Oh (US Patent No. 5,791,523). Oh ('523) disclose a dispensing apparatus for a refrigerator and comprising: a door (22), a spigot (30) coupled to a water discharging member (41) with valve members, a valve actuator switch (52) and a recess area (23). When said lever is depressed a magnet 52 thereby depressing a magnet (51) on the lever that is attached to valve (33) in the spigot and whereby it opens to dispense cold water.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oh ('523) in view of Oh (US Patent No. 6,003,734). Oh ('523) discloses the claimed invention as stated above, however lacks a resilient member. Oh ('734) discloses a resilient member (18) in contact with a water discharge lever. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the disclosed invention of Oh

Art Unit: 3744

('523) with a resilient member as taught by Oh ('734) for applying an elastic force to a dispensing member.

Allowable Subject Matter

Claims 11-15 are allowed over the prior art of record.

Claims 4-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
